Sample of Students Evaluation - 2009

Available to answer any questions. Great job.

Best professor ever.

More interesting labs would be...more interesting.

Dr. Kamil is very enthusiastic on what he teaches. He presents well- organized instruction in lab.

This is the best professor I've ever had in my 3 years of college. By far outshines any professor here at ACC. I think every professor here, current or future should sit in & observe his methods. Not only is he knowledgeable on the topic but he knows how to get the information across to the students clearly and most professors only know how to explain the material in one way, and he knows how to rephrase it in many different levels. When you pay for an education, it's nice to have someone that is worth paying for. GREAT JOB! ☺

I have no critical recommendations for lab improvement. Dr. Jbeily is an asset to ACC.

This is my second attempt at Chem I. I specifically arranged my schedule to make certain that Dr. Jbeily would be my instructor again. His teaching style and manner of presentation is extraordinary.

Wonderful professor. He puts the material in understandable terms, is always available to answer questions & clarify the material. He makes the learning opportunity fun.

Would prefer more frequent evaluations. I.e., more grades contributing to the final course grade.

The instructor gives a clear instruction on how to do the lab and a very good job at it.

Dr. Jbeily explains the lab work very clearly and in detail. His teaching method and requirements for us to complete the labs were very helpful in understanding what we were to do.

Dr. Jbeily is a great instructor. He is thorough and clear in his instructions and the class is challenging in a great way. He is passionate about the material and knows what he is talking about. He is encouraging to every student and genuinely wants to see everyone do well. He is very safety conscious in the lab and is helpful to everyone.

Great structure for preparing for labs; and adequate time and explanations to carry out lab.

Fantastic teaching!

Very good experience in the lab!

This is the best Chem class I have ever taken. I learned so much and I plan on taking more chemistry as I progress in school. If I absolutely had to find room for improvement I would say that when doing equations in class he should continue to equation all the way through until the end. But this class was the greatest. Mr. Jbeily was the best Chem teacher I've ever had. I will look for him as a teacher in the future.

I understand and like the way he explains and answers questions.

The lecture PowerPoints were very useful and easy to follow.

I love this class.

He explains the material in a way that I understand and that I can prepare for test.

Great instructor, explains everything exceptionally well.

I will definitely be taking more chem courses with Prof. Jbeily.

Wonderful professor.

Professor explains the lab clearly and expects you to have read the lab before class and prepare a step by step guide. He is almost always open to questions during lab, but expects you to accomplish it on your own.

Love it! I feel like I am on my own but like he is always there.

Teacher is good.

It is very helpful when you explain what we need to do in the lab. I like how you write information on the board and show us how to use certain items in the lab also. It was helpful that you told us to prepare the lab instructions and advanced study assignment prior to the lab.

Recommendations: Give students the opportunity to make up labs.

Great instructor, explains everything so it is understood.

I like this class.

I would only recommend letting the students know which particular sections were actually going to be covered as opposed to having to type out the complete labs.

Great teacher! I would take him again.

Great Professor. Cares a lot about the subject and makes sure the students understand before he goes on.

Professor Jbeily is a great teacher and has made this chemistry class interesting while imparting knowledge.

The class is great. Dr. Jbeily is very easy to understand. I would like to work in class on the handouts. I guess we don't do it too often because we don't have enough time.

Professor Jbeily teaches very well and also encourages student to study hard.

Dr. Jbeily is an excellent teacher; he really engages the students and is very perceptive of and attendant to students who struggle with the material. He is very approachable and enthusiastic about helping the classes' understanding of the material. He also has a very positive attitude that is infectious. He is one of those rare teachers that honors students and places their learning as the primary focus of his teaching.

Dr. Jbeily is an excellent instructor. He holds the attention of the class and explains difficult concepts in a clear fashion and often rephrases the material. He constantly checks the class for understanding. Dr. Jbeily seems genuinely concerned about the quality of his performance. One recommendation I have is that he could explain the lab procedures a little more clearly.

Prof. Jbeily is a great instructor. He explains everything in the class very well and gives great individual help. He's the best chemistry instructor I've had. I really like the way he makes sure we all understand the concepts before moving on.

Great job. You are very thorough on the matter. You pay great attention to the needs of your students. Your concern for our ability to learn and understand the material shows. Thanks for being approachable and your great attitude.

Prof. Jbeily is always attentive and concerned with students' comprehension. He answers our questions thoroughly and tries to get everyone to participate. Labs are well structured as well.

The material has been presented in a sensible and methodical manner.

Great instructor. He's very much concerned & interested in making sure students learn & understand the material. Homework is a little overwhelming, but it helps a lot in learning the material. I kind wish there was at least one more test to help the grade average.

Overall, Mr. Jbeily explains the material effectively overall!

Mr. Jbeily is very clear in his teaching and what he expects of the students. He is very supportive with students learning and available during class and office hours for assistance. Everything covered in class is on the test and examples are done in class as well. Additional homework is very helpful for practice and studying at home. Mr. Jbeily deserves an A+ for his teaching efforts!

Mr. Jbeily is a great professor, probably one of the best. I enjoy his method of presentation & delivery of the material. He is able to explain chemistry very well.

So far, the material in this class is being taught in a clear and interesting way. There is lots of class participation, and I feel like I'm learning a lot.

His explanation is really clear. His voice is loud. That's good.

Prof. Jbeily: I think that what you teach us in the class is very to the point in the subject. You know very well the subject; you are an expert and that is why you make it understandable to us. The exams are well done to the material that we covered in class.

Very recommended professor.
